1st DARIAH-HR International Conference,
Zadar, Croatia / 13 - 15 October 2021

What is Tezaurus.hr?

#funding

Project Tezaurus.hr (2020 – 2024) is a part of digital infrastructure within DARIAH-HR (The Digital Research Infrastructure for the Arts and Humanities – Croatia)

#partners

Institutional partners and individual experts from GLAM communities

#languages

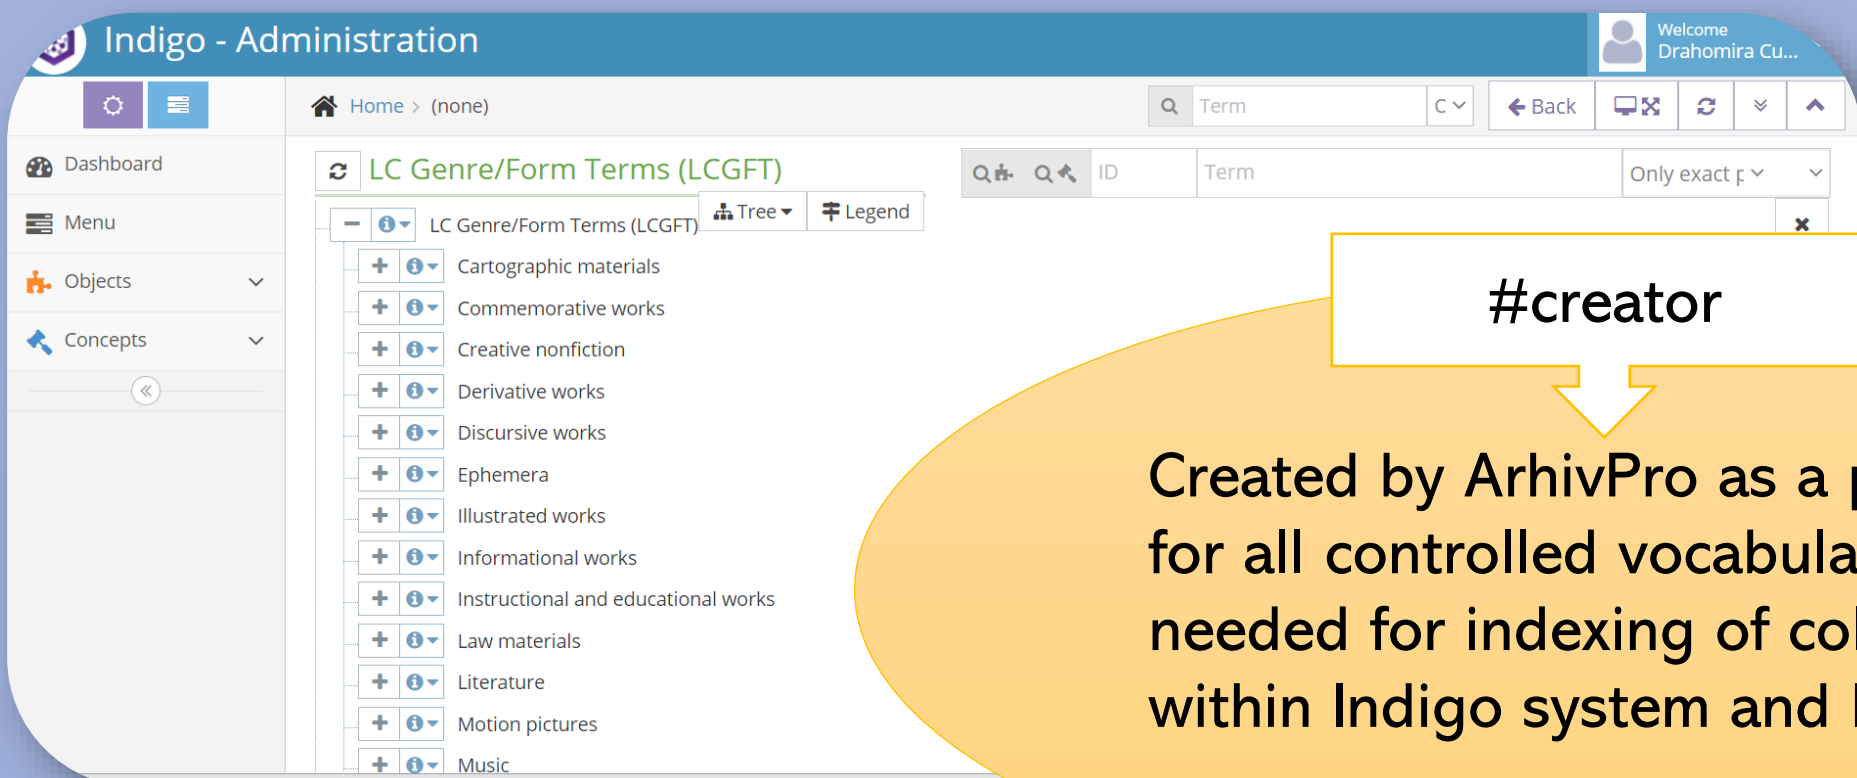

Built to be multilingual (interface & content)

DE

FR

EN

HR

#creator

Created by ArhivPro as a platform for all controlled vocabularies needed for indexing of collections within Indigo system and beyond

#metadata

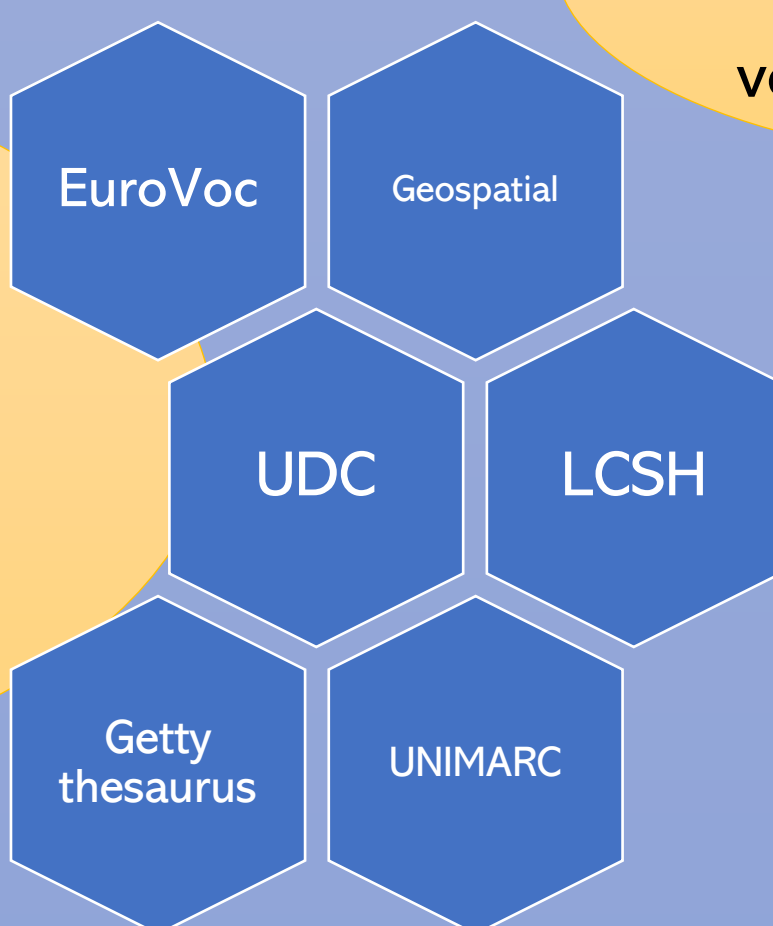

Retains standard administrative data sets for each term and vocabulary

#characteristics

Flexible, easy to collaborate, use, reuse and connect vocabularies & records

#interoperability

Based on ISO international standards for controlled vocabularies in order to be interoperable with other standards and protocols – able to import all available vocabularies, or 'built from scratch'

Example

Conclusions

- ✓ Many projects in social sciences and especially digital humanities recognized necessity and importance of controlled vocabularies across disciplines.
- ✓ There is a significant effort in creation of different (multilingual) thesauri.
- ✓ Controlled access points are crucial for enabling access to the content of the specialized (digital or digitized) collections.
- ✓ Tezaurus.hr shows great potential to all in GLAM communities interested in collaborative development of controlled vocabularies that can be created, used, and reused by all.
- ✓ Tezaurus.hr is expected to play important role as an infrastructural support in future projects in digital humanities.
- ✓ Tezaurus.hr is seeking partners. If you are interested, scan the QR code and fill in an application (in Croatian).
